

Stability index: This shows the stability of classrooms by showing how many students were there the whole year. The index gives the number of students who were enrolled at the school 160 days or more, as a percent of the October 1 enrollment. ALCs and treatment centers are excluded from the district-wide index.

(Good when high.)

These schools had low stability in 2001-2002 as defined by 75% or fewer students at the school 160 days or more as a percent of Oct 1 enrollment.

School	2001-2002	
	Mobility	Stability
1. HUMBOLDT SR	53%	75%
2. VENTO	48%	72%
3. FOUR SEASONS	10%	70%
4. COMO /SPECIALHARTZELL	18%	65%
5. C'ROADS SCIENCE	12%	59%
6. COMMUNITY K'GARTEN	21%	53%
7. C'ROADS MONTESSORI	10%	53%

These schools had low stability in 2000-2001 as defined by 75% or fewer students at the school 160 days or more as a percent of Oct 1 enrollment.

School	2000-2001	
	Mobility	Stability
1. DAYTONS BLUFF	40%	75%
2. FOUR SEASONS	14%	69%
3. ARLINGTON	38%	65%
4. COMO /SPECIALHARTZELL	20%	64%
5. C'ROADS SCIENCE	12%	52%
6. C'ROADS MONTESSORI	16%	28%

Mobility index: This shows the degree to which classrooms are disturbed by students who enroll and/or leave the school during the school year. The index gives the number of occasions when students enroll after October 1, plus the number of occasions when students leave the district before June 1, as a percent of the October 1 enrollment. The index can count single students multiple times. Only traditional schools are included in the district-wide index.

(Good when low.)

These schools had high mobility in 2001-2002 as defined by more than 25% of occasions when students enrolled or left the school after Oct 1.

These schools had high mobility in 2000-2001 as defined by more than 25% of occasions when students enrolled or left the school after Oct 1.
